Sumitronics Corporation

Request for attachment of JEITA Standard C3 Label

Dear Sirs;

To satisfy traceability requirement from customer and market, Sumitronics decided to introduce JEITA standard Label format which shows electronics component information such as PN, Qty and Lot No on component's package.

JEITA (Japan Electronics and Information Technology Industries Association) standardized this label called C3 Label, since 1990s and were penetrated to electronics industries as standard, and you have already attached several information on your product's package in letters or barcode and so on.

By introducing standard C3 label, we can record and trace your product's Lot information in all our process from receiving, assembly, delivery to customer.

In case of any quality problem, we can feedback your product information quickly and precisely, then you can make quick action to your/our customer.

Please see attached, details are on these sheet and please consider to introduce C3 Label on your product's package. We enclose questionnaires for this issue, please fill your reply such as current label status, C3 label attachment schedule, problem for attachment and so on.

This C3 label is applied for Inner Standard Package not for delivery package.

As for delivery label, please ask our staff and follow our request for delivery label.

Please understand the above situation and purpose of C3 label and we will appreciate your earliest introduction of C3 label attachment.

If you have any questions for this issue, please contact person in charge.

Sincerely yours,
